

Quick reference guide

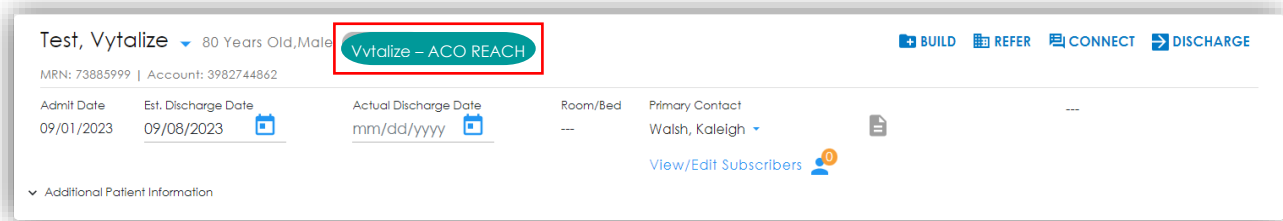

Vytalize Health

Vytalize Health, a leading provider enablement platform and Medicare Accountable Care Organization (ACO), provides a data-driven care delivery system for Medicare patients. Their multidisciplinary clinical team serves as an extension of each physician, designing customized care plans for Medicare patients that are proven to prevent and reduce hospitalizations and improve quality of life; showing a 41% reduction in ED utilization.

WellSky has partnered with Vytalize Health, bringing you a more streamlined discharge planning workflow.

CarePort Discharge workflow

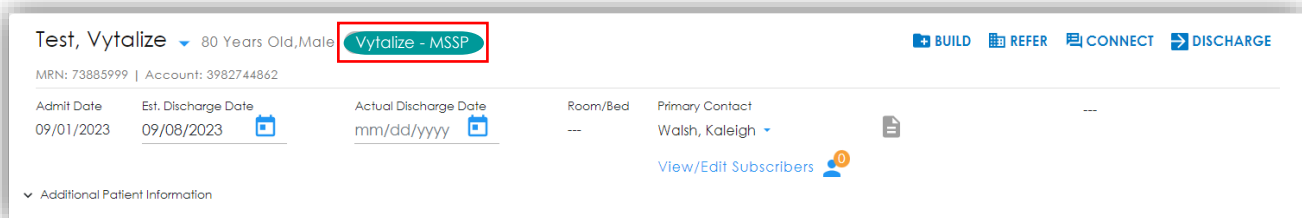

Vytalize members will be identified through CarePort attributions signifying either ACO REACH or MSSP membership.

The screenshot shows a patient record for 'Test, Vytalize' (80 Years Old, Male) with MRN: 73885999 and Account: 3982744862. A red box highlights the attribution 'Vytalize - ACO REACH'. The interface includes buttons for BUILD, REFER, CONNECT, and DISCHARGE. Below the attribution, there is a table with columns for Admit Date (09/01/2023), Est. Discharge Date (09/08/2023), Actual Discharge Date (mm/dd/yyyy), Room/Bed (---), and Primary Contact (Walsh, Kaleigh). A 'View/Edit Subscribers' link is also visible.

Vytalize **ACO REACH** attributed patients are eligible for *additional* benefit enhancements; SNF 3 Day Waiver and Home Health Homebound Waiver.

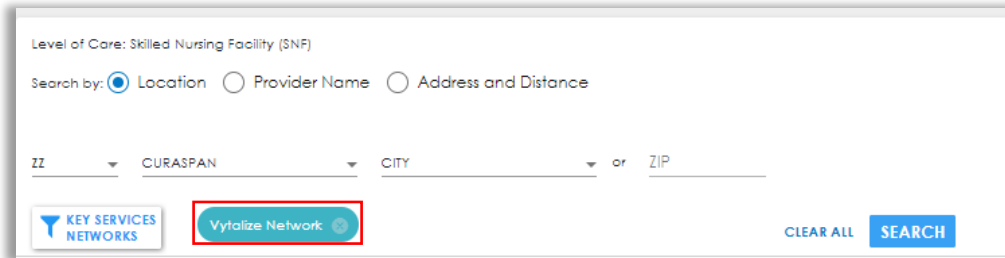

- **SNF 3 Day Waiver:** discharge patients to SNF LOC sooner utilizing the Vytalize SNF 3DW network.
- **Home Health Homebound Waiver:** provide services to patients who don't meet homebound criteria, but still require services at home.

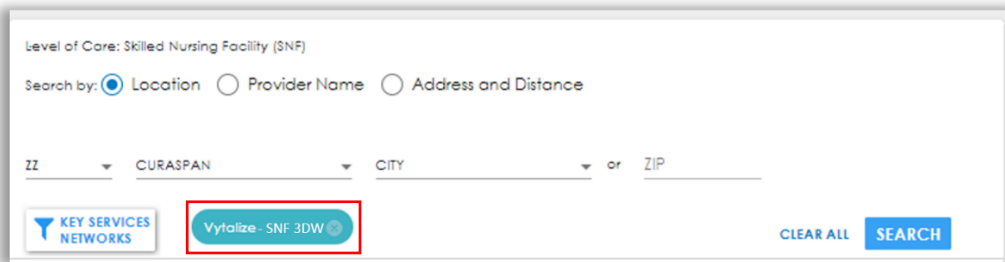

The screenshot shows a patient record for 'Test, Vytalize' (80 Years Old, Male) with MRN: 73885999 and Account: 3982744862. A red box highlights the attribution 'Vytalize - MSSP'. The interface includes buttons for BUILD, REFER, CONNECT, and DISCHARGE. Below the attribution, there is a table with columns for Admit Date (09/01/2023), Est. Discharge Date (09/08/2023), Actual Discharge Date (mm/dd/yyyy), Room/Bed (---), and Primary Contact (Walsh, Kaleigh). A 'View/Edit Subscribers' link is also visible.

Vytalize **MSSP** attributed patients are *not* eligible for additional benefit enhancements.
Utilize the Vytalize Network to refer from a list of high-quality post-acute providers.

High-quality post-acute networks will be displayed for patients specific to their location. When sending a referral for a patient with the Vytalize tag, navigate to the Vytalize network using your standard process to filter networks within your CarePort discharge planning solution:

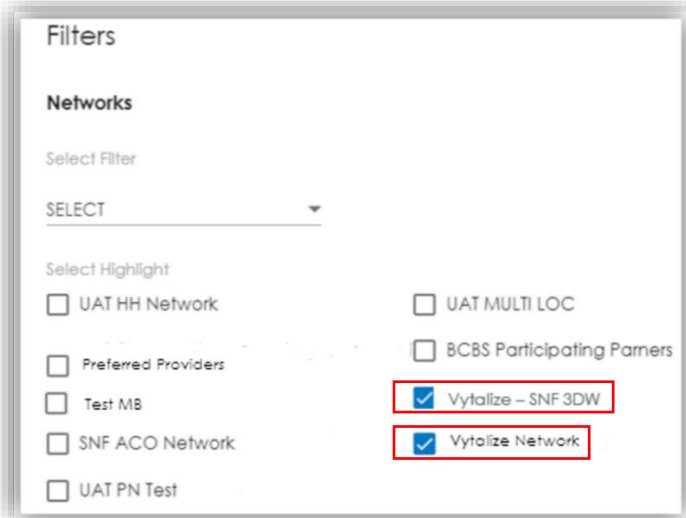

Level of Care: Skilled Nursing Facility (SNF)
 Search by: Location Provider Name Address and Distance
 ZZ CURASPAN CITY or ZIP
 KEY SERVICES NETWORKS **Vytalize Network** CLEAR ALL SEARCH

Level of Care: Skilled Nursing Facility (SNF)
 Search by: Location Provider Name Address and Distance
 ZZ CURASPAN CITY or ZIP
 KEY SERVICES NETWORKS **Vytalize - SNF 3DW** CLEAR ALL SEARCH

When referring to SNF LOC [for ACO REACH patients] utilize the **Vytalize – SNF 3DW** to choose from the network of CMS approved providers who can accept the benefit enhancement.

WellSky’s partnership with Vytalize Health is aiding in the transition of care process by keeping the Vytalize physician network up to date with patient care events through CarePort Connect. Vytalize Health invests in network, care coordination, connected community building, and tools for provider value-based care success. Referring to post-acute providers within the Vytalize network will leverage further patient support and continuity of care.
