

# WellSky<sup>®</sup> Activate

Connecting you to the WellSky acute and post-acute network during a critical care event to guide patient care

As value-based programs are becoming more prevalent, next-generation organizations are taking on more risk. They need a better way to connect to acute and post-acute care teams, engage more efficiently with their patients, and control healthcare spending.

By partnering with WellSky, providers gain direct access to an expansive network of acute and post-acute providers, which can help them expand their benefits and care models into the acute setting to reach more patients as well as ensure their patients receive more appropriate and timely care.

**2,000**  
hospitals

**130,000**  
post-acute  
providers

**13M**  
discharges per  
year

**52M**  
referrals

**12M**  
event notifications  
per day

WellSky Activate is a services and technology suite that helps you extend your benefits and care models to more patients.

## Services

The WellSky Provider Engagement team can help you:

- Educate hospital and post-acute partners about your organization
- Equip acute case managers with program information that they can share with patients at their bedside
- Optimize workflows to maximize your patient engagement efforts

## Technology

Improve the patient journey with technology:

- Identify your patient roster across the WellSky network to optimize patient engagement
- Drive hospital workflows, such as displaying your high-quality post-acute network or prompting enrollment forms
- Display patient eligibility and details of your program to case managers with an automated, customizable pop-up notification
- Allow case managers the ability to electronically share or print your organization's information with the patient and their family before they leave the hospital

## Additional benefits of WellSky Activate:

- Drive new member enrollment by improving the effectiveness of your patient engagement strategies
- Improve post-acute spending and control total cost of care
- Increase visibility into a patient's journey across the continuum
- Close gaps in care and reduce avoidable readmissions
- Grow and strengthen partnerships with hospitals and health systems
- Improve care and outcomes for patients
