

Expand the **health care services** you offer by billing Medicaid, Medicare, and insurance companies

Submit claims faster, reduce costly denials and get paid sooner — with Billing Manager

This powerful solution helps you expand your revenue streams and serve your community with essential new services. You can easily generate the 837 and 835 forms required to bill Medicare, Medicaid, and private insurance companies. Plus, you gain validation tools that reduce the denied claims that often come with medical billing.

- **Manage all data in one system – clients, services, billing**
- **Submit claims via the respected Claim MD clearinghouse**
- **Reconcile payments and claims automatically**
- **Reduces denials with WellSky's claim scrubbing technology**

This billing module for WellSky Community Services is fully HIPAA compliant and includes an easy-to-use interface to administer and capture billable service data. Find out how WellSky's industry-leading experience in health care software can help you navigate the complex world of medical billing.

"[Billing Manager] contributed to our ability to expand our adult behavioral health from 60 clients to more than 1,700."

Melissa Godinez

Director of Technology and Strategic Operations
Volunteers of America North Louisiana

Add new capabilities to your WellSky software with these **cutting-edge tools**

Billing Manager is just one of the modules or services you can add to WellSky to enhance your efficiency and bring greater impact to your community.

Ask your WellSky consultant about these opportunities to extend the capabilities of your Community Services software.

Resource Directory

Connect your citizens to the services they need

This turnkey solution pulls provider data directly from WellSky Community Services and converts it into a web-based resource directory or smart phone app. You'll work with our web developers to design a unique site that best fits your needs. Then WellSky does all the hosting and maintenance, so you can focus on your mission. Your website and/or app data refreshes automatically when you edit a record in Community Services.

Eligibility

Instantly see the programs your client can access

Now you don't have to remember all the programs in your community or the requirements for each. This handy module tracks the eligibility standards for each program in your network and then finds the best matches for a client. Each agency or program manager can customize their requirements at the program or project level.

Fund Manager

Seamlessly integrate grant management data with client activity

Fund Manager delivers a full picture of how funds are spent and who those funds assisted. It creates an auditable record of services tied to a specific grant or funding source. The system provides not only statistical reporting, but analyses like longitudinal outcomes that allow a grant provider or government agency to see the long-term impact of their assistance. You also identify expiring grants, so that you put them to use.

Contact Center

Create a fully-functional call center or I&R system powered by your WellSky database

This powerful module helps your staff log calls, capture client information and refer those in need to the most appropriate providers. You manage these referrals in Community Services to maximize coordination and accountability. A full library of reports gives you complete visibility into your call operation. Ask about telephony integrations that save you even more time!

Managed Services

Let our team of solution experts maximize the power of your system

Now you can work directly with our solution experts to solve your configuration, compliance, and reporting challenges. Whether you need a one-time fix, continuous administrative help, training or advice, WellSky can help you get the most from your system.
