Kestra partners with Bonafide, powered by WellSky, to better protect and support at-risk patients

About Kestra Medical Technologies

Kestra Medical Technologies develops wearable medical devices and digital healthcare solutions for people with cardiac conditions. Its innovative, user-friendly products help monitor these individuals, provide them with therapeutic benefits, and help them stay mobile while they receive continuous care. Kestra equips both patients and healthcare providers with intelligent tools that enhance collaboration, improve treatment, and promote better health outcomes.

The challenge

Each year, about 436,000 people in the United States die from out of hospital cardiac arrest, according to the American Heart Association[1]. In many of these cases, early defibrillation can help restore a normal heart rhythm.

That is why Kestra developed the ASSURE® system, a modern wearable cardioverter defibrillator (WCD) that supports individuals at risk of sudden cardiac arrest. To successfully launch and expand this life-saving technology, the company required a robust enterprise resource planning (ERP) software to manage growth and operations more efficiently.

Why Bonafide, powered by WellSky?

As Kestra evaluated ERP partners, their top priorities were patient safety, effectiveness, ease of use, and empowerment for both patients and caregivers. To support its mission of providing innovative, intuitive medical technologies, Kestra partnered with Bonafide as its ERP provider to ensure efficient operations and continued growth.

Bonafide, powered by WellSky, has enabled Kestra to:

Streamline supply chain & compliance

- Tracking of components and finished devices
- Automated documentation and reporting for FDA, HIPAA, and ISO compliance

**Optimize order management & customer service**

- Faster order fulfillment with end-to-end tracking and updates
- Seamless integration with insurance providers for claim submissions

Data-driven operations & profitability

- Dashboards providing insights across inventory and operations
- Automated workflows reducing manual tasks and operational costs

Explore Bonafide, powered by WellSky.

Discover how your DME/HME business can **make more informed decisions** to enhance patient care and improve service delivery.

Bonafide is now part of WellSky, a leading healthcare technology company driving intelligent, coordinated care with software, analytics, and services that help improve outcomes and reduce costs. Its home infusion and home health solutions complement Bonafide's expertise, expanding provider capabilities and strengthening industry partnerships. Through the WellSky network of 2,000+ hospitals and 130,000 providers, Bonafide clients gain access to the nation's largest referral network, improving visibility and patient care coordination. Over the past year, more than 1 million referrals were sent to DME and HME providers using hospital discharge solutions from WellSky.
