

"WellSky® gives us consistency of clinical documentation and excellence.

Having a platform across your enterprise creates consistency and reduces clinical variability. **It's critical to have a partner like WellSky.** You can't do it on your own."

Moving to a cloud-based, enterprise-class solution has never been easier.

WellSky®, formerly Kinnser Software®, developed the first web-based solution for home health in 2003 and is today the leading enterprise-class, SaaS (Software as a Service) solution serving home health, hospice, and palliative care. We are software transition experts, helping hundreds of agencies every year move to our easy-to-learn, easy-to-use solution. Our 100% web-based software dramatically reduces costs while providing the flexibility you need to move your agency forward.

nothing to install | no server to maintain no upgrades to schedule | no per user fees

52 million visits using WellSky®

Harness the power of next-level software, analytics, and services to drive better outcomes, lower costs, and improve collaboration across providers, payers, and health systems. WellSky is the innovative partner you need to achieve outstanding performance and bolster strategic growth — today and into the future of value-based care.

With WellSky, you'll experience performance that puts your agency on the path to success. Time-consuming and redundant processes that keep your team from delivering better care will be automated and standardized. And because WellSky is built for teamwork, your entire organization can communicate and collaborate to streamline coordination of care.

Experience efficiency that empowers your agency to **build value** while delivering amazing care at scale

Connect & collaborate

- + Real-time HIPAA-compliant messaging with your entire staff
- + Automatic routing of documents for faster processing
- + Online case conferences
- + Integrated physician access portal for e-referrals

Deliver amazing care

- + The easiest system for clinicians to learn and use
- + Real-time access to full charts
- + Faster, more intuitive scheduling process
- + Efficient clinical notes even when disconnected from the web via the WellSky Offline app

See the big picture with access to key financial & organizational insights

Get deeper insight into your organization's operations and bring outcomes into focus for improved care, compliance, and financial performance. The results are better data, enhanced reporting, and consistent quality. And because your entire organization runs on WellSky®, you'll be able to manage multiple lines of business at once. You'll see the big picture and make decisions faster.

Data-driven decisions

- + Accurate financial and clinical data anytime, anywhere
- + Real-time executive dashboard
- + Automatic Medicare eligibility checks
- + CAHPS integration
- + Predictive analytics to prevent hospitalization from home health and support quality end-of-life care in hospice

Financial insights

- + Accrual accounting
- + Hard close
- + Reliable and accurate accounts receivable
- + Accelerated revenue cycles
- + Unified workflow for all claim types
- + Track your most important metrics and visualize trends with WellSky Business Intelligence for Home Health and Hospice

"It's nice to have a system that can combine the clinical side of my business with the financial side, and make both run more efficiently. Jan Vandenburg, Owner Metro Therapy Company

WellSky's approach to **training and support** is a big part of why we have a client retention rate of 99%. We offer flexible strategies that get your teams started quickly and maintain their skills over the long term.

- + Training of your entire staff by certified WellSky® trainers
- + Unlimited access to ongoing training in English & Spanish

WellSky® **CareInsights** for Home Health

Home health's most advanced predictive care support solution

WellSky CareInsights for Home Health transforms EHR data into an intelligent care optimization and decision-making support solution that helps you proactively manage your patient population, improve outcomes, and maximize efficiency.

Powered by algorithms drawn from the data of over seven million home health episodes, WellSky CareInsights analyzes your entire patient population to present a comprehensive view of key factors that inform quality care:

+ Real-time hospitalization risk

Real-time visibility into your entire census allows administrative staff to deploy the right clinical resources at the right time so you can improve patient outcomes and decrease hospital readmissions. And you'll have the data to market your success and expand your referral relationships.

+ Care setting suitability analytics

If a patient's health is declining, home health may not be the right care setting. WellSky gives you data-driven support to discuss care setting with a patient's physician. For home health agencies that also provide hospice, this feature allows for thoughtful and efficient resource planning when the patient moves to that care setting.

+ Utilization insights

Drawing on vast historical data from the WellSky Home Health client network and information already being captured on the clinical record, the CareInsights Guidance solution provides customized visit frequency guidelines to balance patient needs with the realities of controlling costs. Clinicians also see the progression of a patient's visits and get alerted about possible LUPAs, removing the need to remember each threshold. This ensures the patient receives the appropriate level of care and the agency receives appropriate reimbursement.

+ CareAssist™

See insights where your clinicians need them most – right at their fingertips as part of their workflow. The CareAssist window is always just a click away, providing a real-time snapshot of a patient's clinical risk factors and social determinants of health.

"With WellSky CareInsights, Concierge Home Care can provide higher quality care, create better outcomes, and separate ourselves from our competitors."

Linda Murphy, RN, BSN, COS-C, CDP, RN-BC COO of Concierge Home Care

WellSky[®] Hospice software

WellSky Hospice was built in collaboration with hospices to address the challenges agencies face every day. This software is a result of aligning real-world processes while making team members more efficient. WellSky Hospice is a comprehensive, integrated point-of-care and back-office software solution that is intuitive, clear, and hassle-free.

- + Web-based, fully mobile, and affordable
- + The **only** software that integrates with WellSky CareInsights for Hospice, the predictive analytics tool that supports better end-of-life care
- + The **only** hospice software informed by the renowned experts at WellSky Services
- + Interoperability to support better outcomes, improve workflows, and accelerate growth while meeting the requirements of advanced payment models and 2015 Certified EHR Technology (CEHRT) designation
- + Patient-centric intake and scheduling
- + Comprehensive clinical charting
- + Easy processing of manual or electronic payments for all payer types on one screen
- + Bereavement management
- + Streamlined scheduling for all disciplines, including volunteers, chaplains, and counselors
- + Exclusive WellSky Hospice Smart QAPI™ feature to design and track custom SMART goals

Extend the power of WellSky® Hospice software

+ WellSky CareInsights for Hospice

With the power of advanced data analytics, predict the hospice revocation and mortality risk for each of your patients. Increase skilled visits when patients and families need them most, take measures to prevent revocations at the right time, and ensure exceptional care at end of life.

+ WellSky Hospice Offline Point of Care

Empower your clinicians to work anywhere, anytime, even when disconnected from the web.

+ WellSky Hospice Electronic Visit Verification

Verify hospice visits with a simple signature at point of care, giving administrators visibility on completed visits.

+ WellSky Business Intelligence

Make better-informed decisions with advanced analytics that help your hospice generate more revenue, drive greater efficiency, identify patient trends, and expose evidence-based opportunities for clinical improvement.

+ WellSky Direct Secure Messaging

Communicate with security and confidence. Enjoy secure exchange of healthcare data across your agency and referral partners with unlimited capacity to send and receive information.

+ WellSky DDE & Payer Connection with NOE Tracker

Eliminate thousands of dollars in lost monthly revenue with powerful claims-processing tools. Quickly validate data, clarify eligibility status, and help your agency avoid penalties. Save hours on data entry/re-entry and appeals diligence.

+ ONC-Health IT 2015 Health IT Module Certification

Leverage interoperability to support better outcomes and power growth, with WellSky's certified electronic health record technology (CEHRT) for hospice.

WellSky® CareInsights for Hospice

Powering better end-of-life care with meaningful data

WellSky CareInsights for Hospice brings innovative machine learning technology to your hospice, so you can deliver better, more predictive end-of-life care for your patients. It is the first prognostic solution that gives you a real-time edge in detecting and improving patient outcomes, all in one central dashboard.

In the last seven days of life, on any given day, 42% of hospice patients have not received a skilled visit.* WellSky CareInsights for Hospice is changing that. By harnessing your team's existing clinical data, we can predict patient outcomes in advance, so you can focus clinical resources on the patients who need them most

WellSky CareInsights for Hospice empowers providers with actionable and insightful clinical tools for long-term improved agency performance. Key features include:

+ Mortality likelihood prediction

Identify individuals in the last 7 days of life, so clinicians can begin additional care measures to ensure sufficient support to patients and families.

Identify patients who are at risk for revoking hospice, predict their revocation risk level, and help prevent it.

+ Patient-level insights

Access patient-specific data to optimize the work of your interdisciplinary team. Understand decline for specific patients, or across your entire census.

"Using WellSky CareInsights for Hospice, our organization now rates in the top 3% of hospices nationally for skilled care provided to patients at end of life. It is the only program with the predictive capabilities and insights that can help us improve on CMS quality measures."

Wendi Snell, RN
Director of Nursing, COO, and Co-Owner

WellSky[®] Palliative software

WellSky Palliative is innovative software that empowers palliative providers to deliver expert patient care at the critical time of diagnosis and throughout treatment. From care planning to coding, WellSky Palliative technology delivers a solution that is purpose-built to assist providers in today's ever-evolving palliative care industry, helping them elevate care for people with chronic illnesses.

- + Configurable patient-centric encounter charting
- + Easy provider billing with a seamless claim process
- + Streamlined e-prescribing process with DEAcertified software
- + Personalized, discipline-specific dashboards
- + Offline charting capabilities for constant documentation accessibility
- + Interoperability to support better outcomes, improve workflows, and accelerate growth while meeting the requirements of advanced payment models and 2015 Certified EHR Technology (CEHRT) designation

Extend the power of WellSky® Palliative software

+ WellSky e-Prescribing

Access the fully DEA-certified module that aids in streamlining the delivery of medications to patients who have chronic illnesses.

+ WellSky Mileage

Seamless and easy, WellSky Palliative's integrated mileage tracking solution gives administrators real-time oversight and immediate insight to accurately reimburse staff.

+ WellSky CRM

Leverage our fully integrated customer relationship management (CRM) module to grow your palliative program. Track all incoming leads and monitor lead conversions as potential patients become qualified referrals and active patients.

+ WellSky Secure Messaging

Increase care coordination, empower efficient communication between team members, and easily make critical documentation notes in patient records.

+ WellSky Billing and Revenue Cycle

WellSky's team of respected industry leaders is dedicated to advancing post-acute care and to helping improve your agency's profitability, quality, efficiency, and growth. Our market-leading billing and revenue cycle software and services power financial and operational success.

+ ONC-Health IT 2015 Health IT Module Certification

Leverage interoperability to support better outcomes and power growth, with WellSky's certified electronic health record technology (CEHRT) for palliative care.
