

# Web-based software for palliative providers caring for people with chronic illnesses

Improve patient care and grow your program.

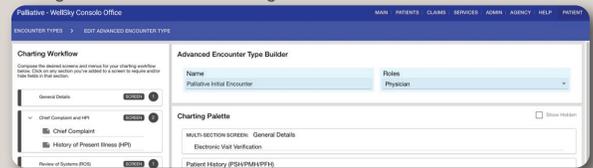

**WellSky Palliative** is innovative software that empowers palliative providers to provide expert patient care at the critical time of diagnosis and throughout treatment. From care planning to coding, WellSky Palliative technology delivers a solution that is purpose-built to assist providers in today's ever-evolving palliative care industry, helping them elevate care for people with chronic illnesses.

## The software solution that is **designed for your success.**

### Configurable encounter charting

Easy-to-use drag-and-drop functionality lets clinicians easily identify which charting elements they want to use, while also configuring those elements into a streamlined workflow that makes charting quicker, easier, and more patient-centric.

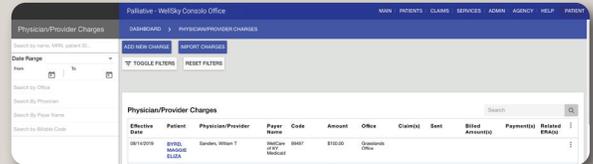

### Configurable encounter charting

### Provider billing

Physician fee-schedule billing is easier than ever. WellSky Palliative accommodates per-payer fee schedules and delivers a seamless claim process for palliative encounters.

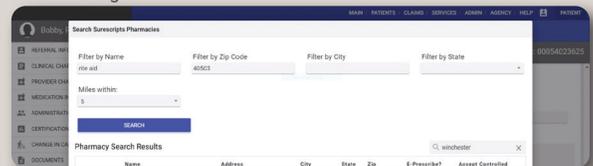

### Provider billing

### e-Prescribing

Simplify and streamline your e-prescribing process with software that has been rigorously reviewed and is fully DEA-certified. Easily transmit prescriptions to thousands of available network pharmacies.

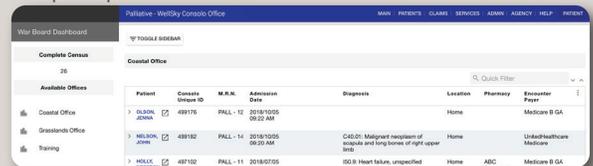

### e-Prescribing

### Discipline-specific dashboards

Empower every member of your team with information relevant to their specific roles and their patients' needs. Personalized, discipline-specific dashboards allow users to quickly access the exact information and tools they need to deliver care.

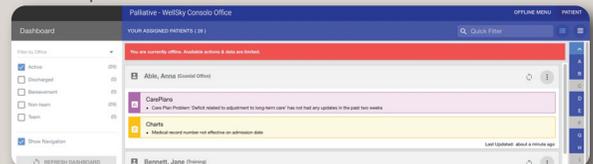

### Discipline-specific dashboards

### Offline capabilities

WellSky technology lets clinicians continue to care for patients, even without internet access. Offline charting capability ensures patient documentation is accessible whenever and wherever you need it.

# Over 10,000 patients receive care powered by WellSky Palliative.

## Affordable

We understand the financial challenges of providing palliative care in today's environment of rapidly changing payment models, and we have priced WellSky Palliative affordably.

## Easy to use

WellSky Palliative provides intuitive workflows that allow providers to customize encounter types and focus on what's most important: delivering exceptional patient care.

## Web-based & mobile

WellSky Palliative is device agnostic, so you can use the tools that best suit your charting style and preferences, including smartphones and tablets.

## Extend the power of WellSky Palliative software

### e-Prescribing

Access the fully DEA-certified module that aids in streamlining the delivery of medications to patients who have chronic illnesses.

### Mileage

Seamless and easy, WellSky Palliative's integrated mileage tracking solution gives administrators real-time oversight and immediate insight to accurately reimburse staff.

### CRM

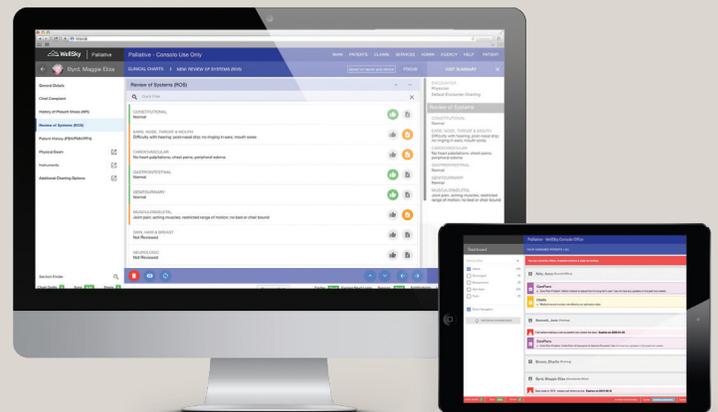

Leverage our fully integrated customer relationship management (CRM) module to grow your palliative program. Track all incoming leads and monitor lead conversions as potential patients become qualified referrals and active patients.

### Internal messaging

Increase care coordination for your team members with WellSky Palliative's secure messaging tools. Empower efficient communication between team members and easily make critical documentation notes in patient records.

### Billing and revenue cycle

WellSky offers market-leading billing and revenue-cycle software and services for palliative care providers. Our team of respected industry leaders have dedicated their careers to advancing post-acute care and to helping improve your agency's profitability, quality, efficiency, and growth.
