WellSky® Specialty Care for Behavioral Health

Purpose-built for inpatient behavioral health providers

Inpatient behavioral health hospitals trust WellSky Specialty Care for Behavioral Health to coordinate the care of mental health and substance use disorders in children and adults. WellSky enables your team to optimize care using intuitive, discipline-specific workflows, alerts, and streamlined documentation specific to the unique needs and conditions of each person being treated.

Intuitive

Our solution delivers intuitive design, worklists, and alerts to power effective and safer care delivery for your patients.

Scalable

With built-in consolidated reporting, multi-site providers can easily scale as their organization grows
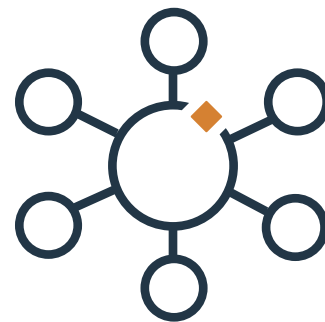

Trusted

WellSky Specialty Care for Behavioral Health is in use in more than 4,000 client facilities.

An all-in-one solution, **designed for growth**

Each module within WellSky's behavioral health solution was built with a purpose. Each integration features comprehensive, industry-leading workflows that deliver seamless integration across the entire health record, billing process, financial system, and all facilities.

Our technology will grow with you. WellSky is scalable and designed to be efficient for organizations with multiple lines of business and locations. Installed on a single database, organizations can define their locations, services provided, site-specific rules, and define a hierarchical mapping that controls user authority, financial system posting, and reporting.

WellSky® Specialty Care for Behavioral Health

Powerful EHR technology

WellSky Specialty Care for Behavioral Health is a robust, web-based solution that's easy-to-use, helping to ensure compliance while delivering better care. Our comprehensive clinical automation solution delivers efficient tools to empower clinical documentation, including intuitive workflows designed by clinicians, for clinicians. These workflows ease the burden of documentation, reduce medical errors, and promote quality outcomes of care.

WellSky enables your team to easily collect data from assessments, electronic signatures, treatment plans, and notes from therapy and group sessions to ensure caregivers are well-informed to deliver coordinated care.

Advanced features in **WellSky Specialty Care for Behavioral Health** support excellent care in every setting, including inpatient, outpatient, crisis stabilization, and partial hospitalization.

Unit at a glance	Get a true interdisciplinary patient summary view by unit, including clinical and medication information to help physicians and care providers access a quick overview of conditions and recent events.
Group notes	Empower your organization's caregivers with the tools to produce documentation for multiple patients during group activities simultaneously.
Master treatment plans	Create individualized treatment plans with patient data pulled directly from the EHR.
eMAR and eTAR	Simplify medication management with prompts for additional information, including sliding scales for CIWA scores and barcoding to promote safety.
15-minute safety checks	Promote a culture of safety with a built-in accountability record, which allows staff to complete patient rounding on mobile devices, including iPads and tablets.
Clinical alerts and charting requirements	Promote compliance-driven care with alerts, including medication administration and follow-up, as well as timelines for documentation.
Data analytics	Access extensive analytical reporting on documentation standards and policies compliance, as well as barcode scanning and documentation of medication effectiveness.

More than
an EHR

WellSky features additional modules that deliver comprehensive, end-to-end support for the operational and clinical aspects of your organization's healthcare management.

"WellSky Specialty Care for Behavioral Health helps save time capturing and entering data, which allows doctors, nurses, and clinicians to spend more time delivering patient care."

Thomas Rourke
Senior Vice President of Corporate Development
SUN Behavioral Health

WellSky's Customer Relationship Module (CRM) enables your team to manage referral sources, pre-admission assessments, perform insurance verification, and allowing you to track conversions and develop a data-driven marketing strategy.

WellSky's Revenue Cycle Management (RCM) streamlines and automates all administrative and clinical functions for capturing, managing, and collecting patient service revenue from pre-admission to final remittance.

Our RCM helps you increase total revenue by:

- Reducing your operational costs
- Avoiding missing charges and reducing billing errors
- Decreasing billing errors

WellSky Mobile allows greater flexibility and real-time access to deliver faster responses and care via mobile devices. With our mobile solution, remote users can securely:

- Collaborate and communicate with team members
- Update medical records for immediate review
- Check allergies for better-informed care decisions
- Complete 15-minute patient safety checks

WellSky's Pharmacy and e-Prescribing Modules are flexible and integrated, offering you seamless performance. Our pharmacy module delivers streamlined support for dispensing and billing inpatient, outpatient, institutional, and retail pharmacies.

Our modules allow you to:

- Monitor controlled substances with your patients
- Upon discharge, send an accurate, error-free prescription directly to the patient's desired pharmacy from the point of care

See the bigger picture with access to **data analytics and meaningful insights** for your business

WellSky delivers meaningful insights through a comprehensive reporting and analytics module. Experience the confidence of having a global view of your business operations thanks to easily accessible reports, insightful graphs, and field-level access for user-defined criteria.

Insight reporting and analytics allow you to:

- Easily select and aggregate data to analyze trends or extract patterns to assist in making proactive, data-driven decisions

- Receive a visual alert to negative or positive trends in organization-defined key performance indicators

- View data in interactive charts

- Export data to Excel or .CSV files

- Save results for future reference

Ensure your business is running efficiently and seamlessly by **streamlining and automating key back-office functions**

WellSky's Financial Module automates business functions and streamlines your departmental workflow, including the consolidation of enterprise-wide financial reporting, departmental budgeting, materials, and facilities management through advanced features.

General ledger	Use monetary and statistical information to create a foundation for analysis and budgeting. Users can create definitions of accounts and see postings from all modules in real-time.
Accounts payable	Streamline the supply management, payments, and invoicing process with integrated materials management and purchase order processes that support vendor information, payment, and purchasing.
Materials management	Increase order accuracy and control organization-wide purchases by automating inventory control, par levels, and stock requisitions for accuracy and control of organization-wide purchases. Intuitive technology enables supplies to be charged using a barcode, automating the reordering process.
Facilities management	Keep equipment running like new by tracking equipment maintenance requests and equipment information, including maintenance frequency and the person responsible for performing the maintenance, in one place.

Professional and Outsourced Services that help your organization grow and thrive

Professional Services increase accuracy, improve compliance, and strengthen quality.

Software implementation and training: With over 40 years of experience, our team of technology experts ensure successful software transitions that optimize software use within your organization's process and workflows

Outsourced Services deliver the expertise and analytics needed to improve operations, financials, and outcomes.

Cloud services: Our secure, managed cloud services provide easy, scalable access to your applications and services. By optimizing your existing IT infrastructure, we reduce operating costs and allow your team to focus on those you serve.

Revenue cycle services: Our team is passionate about identifying upstream processes that impact reimbursement. Our expert techniques help mitigate disruptions while developing, adapting, and adjusting your strategy to ensure you have access to the cash flow you need to succeed.

About WellSky®

WellSky is a technology company leading the movement for intelligent, coordinated care. Our next generation software, analytics, and services power better outcomes and lower costs for stakeholders across the health and community care continuum. In today's value-based care environment, WellSky helps providers, payers, health systems, and community organizations solve tough challenges, improve collaboration for growth, harness the power of data analytics, and achieve better outcomes by further connecting clinical and social care. WellSky serves more than 20,000 client sites — including the largest hospital systems, blood banks, cell therapy labs, blood centers, home health and hospice franchises, post-acute providers, government agencies, and human services organizations. Informed by more than 40 years of providing software and expertise, WellSky anticipates clients' needs and innovates relentlessly to ultimately help more people thrive.
