

Delivering compliant EVV solutions to meet federal and state mandates

The 21st Century Cures Act mandates that states implement EVV for all Medicaid Personal Care Services (PCS) that require an in-home visit by a provider. Specific elements of a visit must be electronically verified, including:

- Type of service performed
- Date of the service
- Individual providing the service
- Individual receiving the service
- Location of service delivery
- Time the service begins and ends

WellSky® is the partner to help ensure you're ready.

If your state allows you to choose your own electronic visit verification (EVV) solution, **WellSky® Personal Care** is compliant with federal requirements. WellSky captures EVV information via both telephony and the WellSky Personal Care mobile app when caregivers clock in/out – automatically recording the date, time, location, services rendered, and any other visit information.

Many states and managed care organizations (MCOs) have chosen, or are in the process of choosing, one or more EVV vendors that home care agencies must work with to submit their EVV information.

WellSky knows what you need to do to comply. We build solutions in to the WellSky platform, integrating with many of the most popular EVV vendors, including HHAExchange, Sandata, and Tellus.

The WellSky Personal Care mobile app makes it easy for caregivers and administrators to manage schedules and shifts.

- Clock in/out
- Document tasks performed and add notes
- Record care notes, mileage, and expenses
- View schedule and shift information
- Navigate to client's home in your device's Maps app
- Immediately respond to available shift offers
- Capture client and caregiver eSignatures

Do you know the plan for YOUR state?

WellSky works directly with states, MCOs, and our customers to integrate with each state's systems and EVV vendors.

The result?

A seamless process within WellSky captures all of the actions and information you need to be in compliance with EVV mandates. If you are or will be billing Medicaid, you can trust us to deliver the solution. The largest home care enterprises trust WellSky.

WellSky EVV implementation methodology

On a state-by-state basis and by selected EVV vendor, WellSky follows a protocol to deliver integrated solutions that meet your state's requirements and implementation deadlines.

Our process for EVV integration

Phase 1: Gather data

Identify state-mandated solutions and implementation timeframes

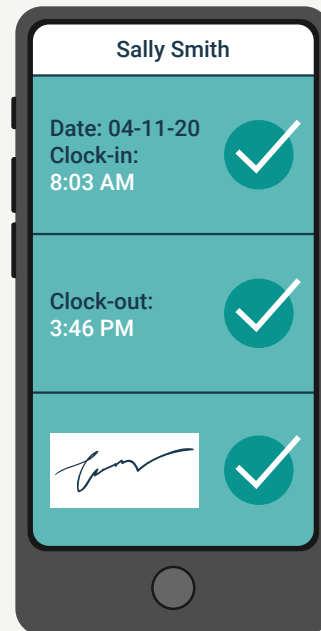

Determine business and functional requirements

Phase 2: Build integrated solution

Define product specifications and integration / implementation timeframes

Development

Phase 3: Roll out integrated solutions

Many states have implemented their own deadlines for compliance. Requirements and timelines change regularly, so check your state's Medicaid website for the latest information.
