

WellSky® Summarize for Personal Care

AI-powered client care summaries to help your staff deliver smarter care

WellSky Summarize for Personal Care is a new AI-powered tool — available for use within the WellSky Personal Care workflow — that generates client care summaries for your staff, helping reduce the amount of time it usually takes to sift through visit notes and care logs. This innovative solution can revolutionize how agencies manage client information and help them work smarter to deliver high quality care.

WellSky Summarize users report the following benefits:

- **Quick access to centralized summaries** of client care information across a 7-, 14-, 30-, or 60-day period
- **Streamlined workflows for improved operational efficiency**, which helps reduce the amount of time it usually takes to sift through visit notes, care logs, changes in condition, and WorkSafe information.
- Improved transparency, allowing you to provide **better, faster updates to families and caregivers**
- **More proactive care management**, helping users quickly identify trends and changes in condition and enabling timely adjustments to care plans

Some agencies have experienced **up to 50% time savings** on pre-visit documentation

 “Using WellSky Summarize, I’ve **cut my pre-visit documentation time in half**. What used to take me 30 minutes or more now takes only 15 minutes at most – this means I’m **saving more than 7 hours per month**. Not only does it free up time to focus on other tasks, but it also allows me to quickly share updates with my team and spot client changes faster.”

John Huston, Owner,
Nightingales Care at Home

“WellSky Summarize **surfaces the really important and relevant information** – from activity notes to caregiver tasks and comments – **in a concise, easy-to-digest view**. Its longitudinal insights highlight condition changes and care trends that might otherwise be missed, and it **saves our team hours of work** that would otherwise be spent digging through notes.”

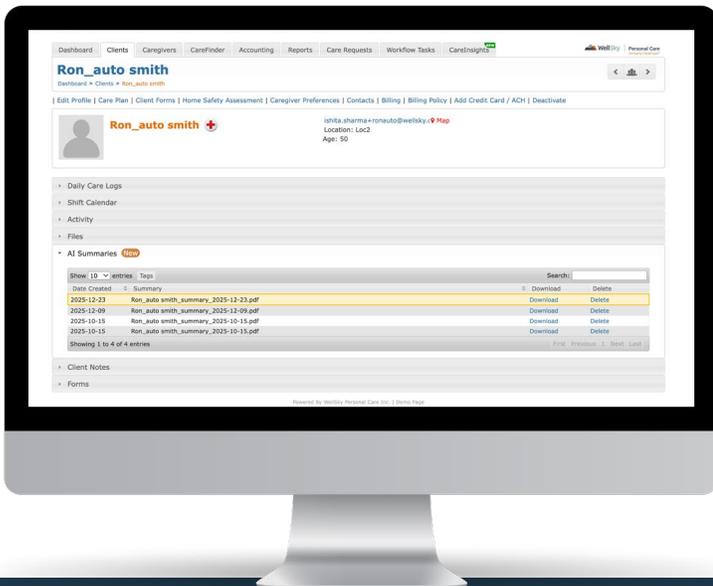

Kunu Kaushal, Founder & Chief Executive Officer,
Senior Solutions Home Care

Built in the WellSky Personal Care solution
WellSky Summarize is directly embedded into the WellSky platform for a user experience that is:

- **Seamless** – Expect an all-in-one, unified workflow.
- **Synchronous** – AI-generated information instantly populates into your WellSky solution for caregiver review.
- **Smart** – It’s powered by decades of WellSky data and experience.
- **Secure** – Your data is protected by robust WellSky security.

WellSky Summarize for Personal Care is part of **WellSky SkySense AI™**, an expanding suite of AI tools from WellSky that helps reduce manual documentation, enhance the patient-provider connection, and improve the overall care experience. At WellSky, our approach to AI puts people first. Our innovations are guided by human intelligence and experience, and we are committed to using AI responsibly and securely and respecting the rights of our users and community – with the ultimate goal of making healthcare better and more cost-effective.
