

A woman with blonde hair, wearing a white polo shirt and black leggings, is smiling and assisting a man. The man is wearing a light green long-sleeved shirt, green cargo shorts, and grey sneakers. He has a white bandage on his right knee and is using two silver trekking poles for support while walking. They are in a bright hallway with large windows on the left and a grey carpet. In the background, another person is partially visible using a trekking pole.

The complete solution suite for inpatient rehabilitation

WellSky® Rehabilitation

About WellSky® Rehabilitation

A solution for every setting of rehabilitation

WellSky's suite of rehabilitation solutions enable our clients to serve over 2.3 million patients annually. Our comprehensive, configurable, end-to-end solutions support inpatient and outpatient facilities in their efforts to improve patient outcomes and facility compliance. From scheduling and documentation to outcomes and billing, our enterprise-class SaaS (Software as a Service) solutions empower organizations to reach their unique goals, regardless of their structure or size.

An electronic medical record **purpose-built for inpatient rehabilitation providers**

For over **25 years**, inpatient rehabilitation providers have trusted WellSky to automate the entire rehabilitation workflow. Our comprehensive solution helps therapists and clinicians generate better results by doing the right thing, at the right time, for the right reason.

- Tools to help nurse liaisons **manage pre-admissions**
- **Mobile notifications** for physician pre-admission screening
- Care planning **specific to the rehabilitation team**
- Compliance-driven, preconfigured documentation that **improves efficiency**
- **Seamless integration** with your hospital-wide electronic medical record (EHR) ensures compliance and flexibility
- Robust scheduling tools to **manage three-hour rule compliance**
- **Intuitive content and workflows** that provide accurate documentation for maximum reimbursement

“WellSky provides more than just a software solution. We’ve come to rely on the ongoing support and expertise we receive from our partners at WellSky.”

Laurie Lehnhof-Watts

Assistant Administrator at East Texas Medical Center Rehabilitation Center

Helping rehabilitation providers
deliver safe and efficient care – as a
stand-alone or an integrated solution.

WellSky's Interface Engine enables seamless communication with systems like ADT, Narrative Results Out, and many others to help streamline your workflows and information management. WellSky's Interface Engine can communicate with all major hospital EHRs.

Easily submit and benchmark your performance with integrations to eRehabData or UDSMR. WellSky produces compliant export files that all outcomes providers can read to eliminate double entry of IRF-PAI data.

WellSky's inpatient rehabilitation-centric scheduling solution automates team scheduling and manages three-hour rule compliance. Patient schedules are available to every practitioner and support real-time communication between clinicians, patients, and their caregivers.

Providing inpatient rehabilitation providers with **more than an EHR**

With additional modules, WellSky Rehabilitation delivers comprehensive, end-to-end support for the operational and clinical aspects of your organization's healthcare management. Our all-in-one healthcare information technology platform spans EHR, revenue cycle management, financial management, mobility, and business intelligence.

"As a director that needs to oversee several different rehab settings, WellSky provides peace of mind knowing that they will always communicate and work with us to implement regulatory changes. Ensuring Joint Commission, CMS and other regulatory requirements are being met is vastly simpler with WellSky charting for both inpatient and outpatient services."

Krin Gresen

Director of Rehab Therapy, Aspirus Wausau Hospital

WellSky's Customer Relationship Module (CRM)

enables your team to manage referral sources, pre-admission assessments, and perform insurance verification, allowing you to track conversions and develop a data-driven marketing strategy.

WellSky's Revenue Cycle Management (RCM) Module

streamlines and automates all administrative and clinical functions to capture, manage, and collect patient service revenue from pre-admission to final remittance.

WellSky Mobile Module allows greater flexibility and real-time access to deliver faster responses and care via mobile devices. With WellSky Mobile, remote users can securely collaborate and communicate with team members and update medical records for immediate review.

WellSky's Pharmacy and e-Prescribing Modules are flexible and integrated with all WellSky Rehabilitation's modules. Our modules allow you to deliver streamlined support for dispensing and billing inpatient, outpatient, institutional, and retail pharmacies.

WellSky's Insight Reporting and Analytics Module help you see the bigger picture with access to data analytics and meaningful insights. Experience the confidence of having a global view of your business operations with easily accessible reports, insightful graphs, and field-level access for user-defined criteria.

WellSky Financial Module automates business functions and streamlines your departmental workflow, including the consolidation of enterprise-wide financial reporting, departmental budgeting, materials, and facilities management.

Efficiently and effectively manage caseload

Improve patient scheduling and caseload management by capturing case type and automatically sending the right information to your schedule with **WellSky Resource Manager**. Our powerful web-based solution integrates with your EHR to utilize data to accurately forecast the average length of stay, helping you make smart staffing decisions to prevent overutilization or underutilization of staff.

Replace whiteboards with technology

Our powerful solution continuously communicates patient compliance throughout the week, allowing care teams to manage expectations and automatically track three-hour rule compliance.

Establish scheduling trends

Track every schedule change to generate insight that enables you to identify and correct bad scheduling habits that can lead to costly compliance problems.

WellSky Resource Manager is part of the WellSky Rehabilitation suite but is also available as a stand-alone resource management solution.

Professional Services that **help your organization grow**

Software implementation and training

With over 40 years of experience, our team of technology experts ensures successful software transitions that optimize software use within your organization's process and workflows.

Managed services

Our solution experts help you maximize the impact of your solution's unique configuration through technical, learning, and optimization & readiness services that:

- Assist with application administration activities
- Enable your users to access in-depth learning opportunities
- Maximize usability and efficiency

Outsourced Services that **help your organization thrive**

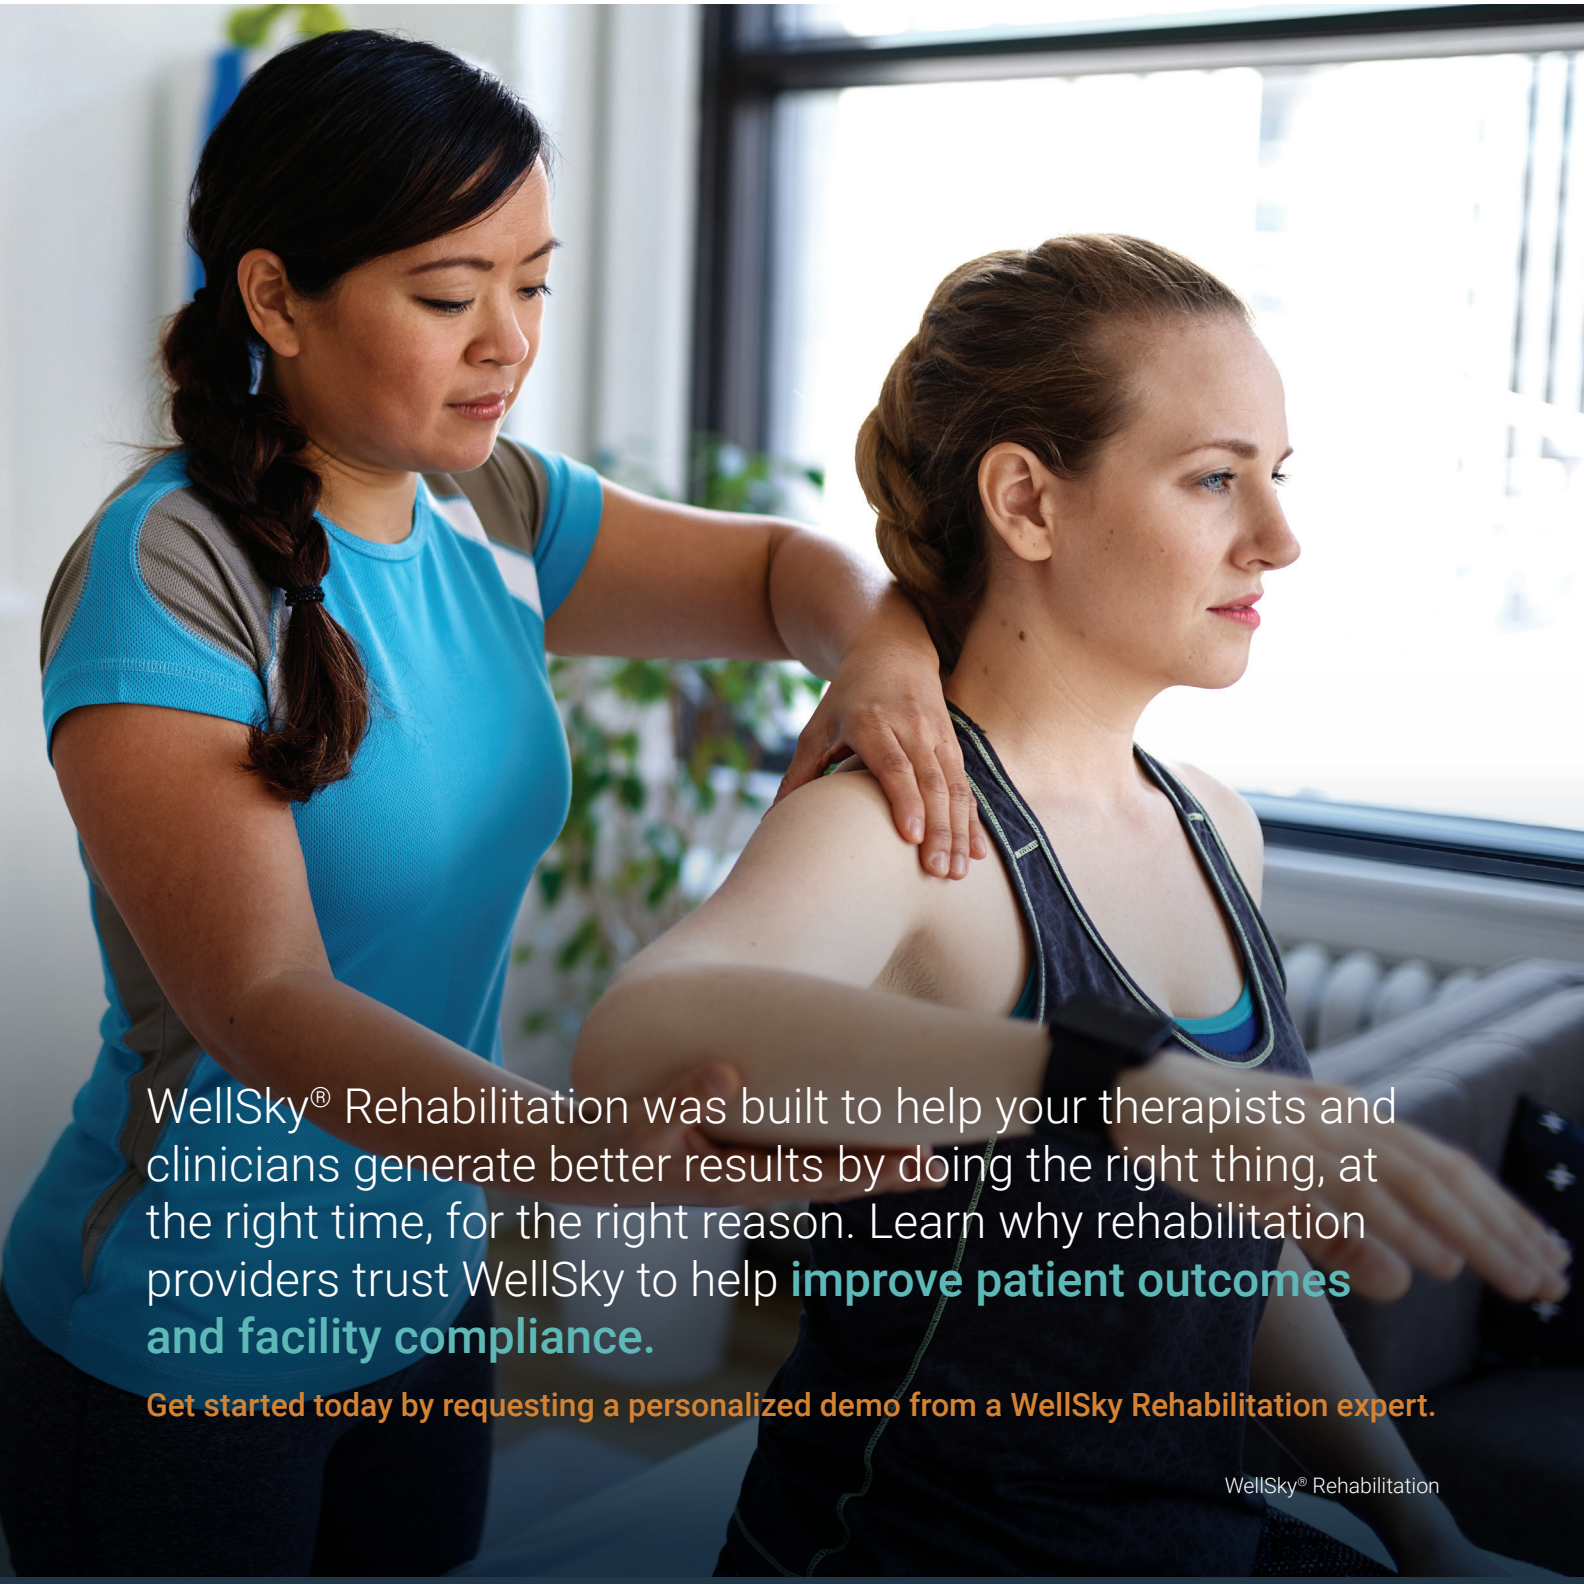

Outsourced Services deliver the expertise and analytics needed to improve operations, financials, and outcomes.

Cloud services

Our secure, managed cloud services provide easy, scalable access to your applications and services. By optimizing your existing IT infrastructure, we reduce operating costs and allow your team to focus on those you serve.

Revenue cycle services

Our team is passionate about identifying upstream processes that impact reimbursement. Our expert techniques help mitigate disruptions while developing, adapting, and adjusting your strategy to ensure you have access to the cash flow you need to succeed.

A physical therapist, a woman with dark hair in a braid wearing a blue and grey athletic top, is assisting a patient, a woman with blonde hair in a braid wearing a dark grey tank top. The therapist is standing behind the patient, who is seated on a piece of exercise equipment. The therapist's hands are on the patient's shoulder and upper arm, guiding her movement. The background shows a bright, modern interior with large windows and indoor plants.

WellSky® Rehabilitation was built to help your therapists and clinicians generate better results by doing the right thing, at the right time, for the right reason. Learn why rehabilitation providers trust WellSky to help **improve patient outcomes and facility compliance.**
