

A woman with dark hair and glasses, wearing a white patterned sweater, is sitting at a desk. She is holding a pen over a notebook and has her other hand on a laptop keyboard. The background is a blurred office setting.

Empowering learning and knowledge for **enhanced outcomes**

The WellSky Learning Center is the best way to provide you and your team with the resources, targeted training, and certification courses you need to succeed. Our continuously expanding library includes content for leadership, clinical, and back-office staff—all developed by the top thought leaders in healthcare.

Manage

Our robust curriculum of courses allows you to develop custom curriculums based on position, hire status, mandatory training requirements, and more.

Track

Centralized contact hour tracking enables you to monitor and report on your team's continuing education status.

Grow

Training can be accessed anywhere via mobile devices, enabling your team to learn and improve their skills, even on the go.

All-Inclusive Learning Management System (LMS)

The WellSky Learning Center's all-encompassing, fully configurable LMS is a valuable training environment that affords your team the flexibility it needs to meet its learning goals. Our system enables you to train your team in one convenient, virtual location. Our full content library covers a variety of topics, ensuring you have the training you need, from onboarding to clinician development and everything in between.

Consulting

Every WellSky Learning Center client is paired with a dedicated implementation specialist, setting up your team for success, even before any training is delivered. Once learning tracks are customized, our team of experts will provide ongoing consulting, ensuring your education plans are on track, empowering your team to gain the knowledge and training needed to provide the very best care.

Competency testing

Once courses are completed, your team will be tested on skills and lessons learned, enabling your organization to adopt a proactive approach to training. Monitor performance levels and assign additional training as needed, helping your team provide the elite care your community expects and needs.

Regular updates

All courses in the WellSky Learning Center are created by industry experts. Courses are designed to enable your team to successfully implement strategies or workflow changes to comply with even the most complicated industry updates. Our goal is to keep you one step ahead of the changes your team faces every day.

Gold standard certifications

WellSky offers highly accessible certification courses, empowering your team to demonstrate their proficiency, enabling your organization to stand out amongst the competition.

Every WellSky certification course provides the highest level of competency while keeping budgets and scheduling top of mind. All pre-certification training, exams, recertifications, and competency testing are conducted online, eliminating travel expenses while allowing individuals to learn and test on their own time.

Over 4,000 healthcare professionals have been certified through WellSky's certification programs.

Demonstrate your proficiency and expertise by enrolling in these WellSky certification programs:

- Board Certified Home Health Coder
- Board Certified Hospice Coder
