Introducing
WellSky Hospice Applied Insights

Powering better end-of-life care with meaningful data

WellSky Hospice Applied Insights brings innovative machine-learning technology to your hospice, so you can deliver better, more predictive end-of-life care for your patients.

You've seen it in headlines and in CMS reports, many hospice beneficiaries are not receiving skilled services during the last days of life. WellSky Hospice Applied Insights helps you do better for your patients. By harnessing your team's existing clinical data, we can predict patient outcomes in advance, so you can focus clinical resources on the patients who need them most.

In the last 7 days of life, on any given day, 42% of hospice patients have not received a skilled visit.*

WellSky Hospice Applied Insights is changing that.

* Source: CMS analysis of FY 2017 hospice claims data

Key Features

- **Mortality Likelihood Prediction**
  Identify individuals in the last 7 days of life, so clinicians can begin additional care measures to ensure sufficient support to patients and families.

- **Revocation Risk Prediction**
  Identify patients who are at risk for revoking hospice, predict their revocation risk level, and help prevent it.

- **Patient-level Insights**
  Access patient-specific data that will help optimize the work of your interdisciplinary team. Understand decline for specific patients, or across your entire census.

"Using WellSky Hospice Applied Insights, our organization now rates in **the top 3% of all hospices nationally** for the amount of skilled care provided to patients at end of life. This is the only program with the predictive capabilities and insights that can help us improve on CMS quality measures."

Wendi Snell R.N.
Director of Nursing
Aspire Home Health & Hospice

WellSky Hospice Applied Insights empowers providers with actionable and insightful clinical tools for long-term improved agency performance.

Using always up-to-date patient information and data, WellSky Hospice Applied Insights is **the only prognostic solution** that gives you a real-time edge in detecting and improving patient outcomes, all in one central dashboard. We built this unique data solution to help fulfill the important mission of hospice care to help serve your patients and families more effectively.

Turn information into meaningful data
Collecting patient information should be about more than keeping a ledger of the past. Transform documentation from historical record keeping into meaningful, practical tools for patients now and in the future. Use your own data to predict outcomes such as mortality and hospice revocation.

Make decisions with confidence
With data identifying your highest risk patients, use informed decision-making so patients experience better and more accurate hospice care.

360-degree visibility
Improve your workflows by identifying gaps in data. In addition to oversight of every patient, WellSky Hospice Applied Insights gives you oversight of your agency's patient care routines to help you identify opportunities to improve clinical processes.

Increase your referrals
Enhance your referral relationships with concrete data about how your team reduces revocation and provides exceptional skilled care at end of life.

Predict outcomes such as mortality and hospice revocation
