# WellSky<sup>®</sup> CareInsights for Home Health

**Unlocking the power of data to create the most advanced care support solution for home health**

**WellSky CareInsights for Home Health gives your team superpowers never seen before in any EHR.**

WellSky CareInsights for Home Health transforms EHR data into an intelligent care optimization and decision-making support solution that improves patient outcomes. As the home health industry undergoes historic changes, WellSky CareInsights for Home Health helps you proactively manage your patient population, excel in value-based care arrangements, and maximize efficiency.

**Elevate clinical confidence and decision-making with insights you can trust.**

Powered by algorithms drawn from the data of over seven million home health episodes, WellSky CareInsights for Home Health analyzes your entire patient population to present a comprehensive view of key factors that inform quality care: hospitalization risk, care setting suitability, and patient visit utilization. This innovation drives a culture of continuous improvement by providing visibility of quality metrics, acute care hospitalizations, and emergency department usage. With specialized features to prevent LUPAs and enhance visit frequency planning, WellSky CareInsights for Home Health is the essential partner to help your agency succeed under the Patient Driven Groupings Model (PDGM).

**“WellSky CareInsights for Home Health allows me to confidently face the challenges that PDGM presents.**

With WellSky CareInsights for Home Health, Concierge Home Care can provide higher quality care, create better outcomes, and separate ourselves from our competitors.”

**Linda Murphy, RN, BSN, COS-C, CDP, RN-BC**  
COO of Concierge Home Care

# Home health's leading predictive care support solution.

## Key features for exceptional care.

### Real-time hospitalization risk

Real-time visibility into your agency's entire census allows administrative staff to deploy the right clinical resources at the right time so you can improve patient outcomes and decrease hospital readmissions. And you'll have the data to market your success and expand your referral relationships.

Hospitalization risk

### Care setting suitability analytics

Understand when a patient's health is declining and home health may not be the right care setting. WellSky gives you data-driven support to discuss care setting with a patient's physician. For home health agencies that also provide hospice, this feature allows for thoughtful and efficient resource planning when the patient moves to that care setting.

Care setting suitability

### Utilization insights

Drawing on vast historical data from the WellSky Home Health client network and information already being captured on the clinical record, the CareInsights Guidance solution provides customized visit frequency guidelines to balance patient needs with the realities of controlling costs. Clinicians also see the progression of a patient's visits and get alerted about possible LUPAs, removing the need to remember each threshold. This ensures the patient receives the appropriate level of care and the agency receives appropriate reimbursement.

Utilization insights

LUPA prevention

Visit Utilization Insights

Visit Type	This Episode	25th Percentile	PDGM Median	75th Percentile	LUPA Assessment
SN	6	3.8	6.8	7.2	Under
MSW	3	1.8	3	4.2	In Line
PT	5	0.8	1.2	1.8	Over
OT	1	0.3	0.5	1.75	In Line
ST	6	3.8	6.8	7.2	In Line
HHA	1	1.8	2.5	3.2	Under
TOTAL	15	9.8	13	17.2	In Line

LUPA Assessment: 5/5

### CareAssist™

Provide your clinicians with insights where they need them most – right at their fingertips as part of their workflow. The CareAssist window is always just a click away, providing a real-time snapshot of a patient's clinical and non-clinical risk factors.
